The African textbook of

Clinical Psychiatry and Mental Health

Prof. David Musyimi Ndetei
Prof. Christopher Paul Szabo
Prof. Tarek Okasha
Dr. John M. Mburu
Professor David M. Ndeitei, MBChB (Nairobi), DPM (London), FRCPsych (UK), M.D. (Nairobi) obtained his medical qualifications from the University of Nairobi, Kenya. After two years he proceeded to the Institute of Psychiatry in London and did his rotations at Maudsley, Queen's Square, Guy's and Bexley Hospitals amongst others in London. During this time he got his Diploma in Psychological Medicine (DPM) and was also admitted as a member of the Royal College of Psychiatrists (UK MRCsprych). He was later elected a Fellow. He also took a one year further training in Psychotherapy at the Institute of Family Therapy, London. While in the UK he enrolled for a Doctorate in Medicine at the University of Nairobi. He accepted an academic appointment at the Department of Psychiatry, University of Nairobi in the early 1980s where he rose through the ranks to the position of Full Chair of Psychiatry in 1995, a position he has held to date. He gave his inaugural lecture entitled: The Walk Towards The Promise: View of Mental Health in Global, Kenyan And Individual Perspectives in 2001. He has held various administrative positions in the University of Nairobi, including Chairman Department of Psychiatry, Acting Dean, Faculty of Medicine and Acting Principal, College of Health Sciences. He has sat on many technical committees appointed by the Government of Kenya. He was recognized by the University of Nairobi by the award of Merit Certificate for Distinguished Service. In 2000, he founded the Africa Mental Health Foundation. He has published in local and international journals. He has been visiting professor of psychiatry and external examiner in psychiatry in several medical schools in Africa and Europe.

He has also been an advisor to both WHO and the World Mental Health Project. He has been involved in UNICEF/UNODC/UNAIDS and many other international organisations. He has contributed to the mental health education for the lay people through numerous television and radio shows and over 700 articles in one of Kenya’s leading dailies. He is a member of the Global Network for Research in Mental and Neurological Health and has developed several Meritorious Award Schemes for academic excellence in Psychiatry and Mental Health for university students.

According to the World Health Organisation (WHO) mental health remains a priority area globally. Over 450 million people worldwide are affected by mental, neurological or behavioural problems. In addition, about 873,000 people commit suicide annually. Mental illnesses are common to all countries and cause immense suffering. People with these disorders are often subjected to social isolation, poor quality of life and increased mortality. Mental disorders remain the cause of staggering economic and social costs.

In Africa, over the years it has become increasingly evident that psychiatric illnesses form a major part of the day-to-day problems. Many patients are presenting with conditions, which directly or indirectly arise from stressful conditions. With increasing demands on life, a highly competitive lifestyle and a desire to succeed, many people are in need of psychological help. It is therefore imperative that the health worker be equipped with adequate knowledge and skills to be able to obtain a psychiatric diagnosis. More emphasis needs to be put on mental health as a key component in the curriculum in order to improve the quality of medical training in Africa.

The theme advanced in this publication is that mental health is bigger than clinical psychiatry and clinical psychiatry practised on its own is incomplete. Thus, various disciplines that constitute the mental health discipline such as clinical psychology, sociology and medical anthropology have been covered.

This book has been authored by a team of over 60 experts from all over Africa who are actively involved in teaching clinical psychiatry and mental health. The target groups for this book include medical students, psychology students, nurses, clinical officers, occupational psychiatric therapists, clergy and any other related disciplines. The book would also be useful to the general practitioner and other health care professionals who interact with patients.

AMREF’s mission is to improve the health of disadvantaged people in Africa as a means for them to escape poverty and improve the quality of their lives. AMREF has almost 50 years experience in health development. In 1957, three surgeons founded the Flying Doctors' Service of East Africa, an organisation that would later grow and develop into the continent's premier medical research organisation. AMREF implements projects to learn, and shares that learning with others to advocate for changes in health policy and practice. Working with and through communities, health systems and ministries of health, AMREF aims to close the gap that prevents people from accessing their basic right to health.

Founded by Prof. David M. Ndeitei in 2000, the Africa Mental Health Foundation (AMHF) is dedicated to research for evidence-based policy, practice in and promotion of mental and neurological health and healthy behaviour. It is now a leading centre of excellence in mental health research and advocacy in the region. It supports several Meritorious Award Schemes for academic excellence in psychiatry and mental health for university students.
# Table of Contents

Foreword ....................................................................................................................... xi  
Preface ........................................................................................................................ xiii
Acknowledgements ...................................................................................................... xv  

**Section I: Psychiatry and Mental Health in Context**
1. Introduction to Mental Health and Clinical Psychiatry .............................................. 3  
2. History of Psychiatry ............................................................................................ 6  
3. Psychiatric and Mental Health Training ................................................................... 11  
4. The Burden of Mental Illness ................................................................................ 14  
5. The Economic Burden of Mental Disorders in Africa ........................................... 18  
6. Stigma and Mental Disorders ............................................................................... 20  
7. Mental Health: From the Perspective of a Paediatrician and Surgeon .................... 24  

**Section II Part A: Clinical Psychology**
8. Human Development and Life Cycle ..................................................................... 31  
9. Personality and Personality Traits ......................................................................... 48  
10. Human Learning ................................................................................................... 55  
11. Human Motivation and Emotions .......................................................................... 59  
12. Memory and Forgetting ....................................................................................... 62  
13. Communication and Communication Skills ....................................................... 66  
14. Psychological Testing ............................................................................................ 69  
15. Stress and Stress Management ............................................................................ 73  
16. Crisis and Crisis Management .............................................................................. 80  
17. Critical Incident Stress Debriefing (Psychological Debriefing) ............................... 85  

**Section II Part B: Medical Sociology and Anthropology**
18. Introduction to Medical Sociology and the Family ............................................... 91  
19. Health and Illness Behaviours .............................................................................. 96  
20. Culture, Health and Illness .................................................................................. 101  
21. Culture and Mental Health .................................................................................. 107  
22. Mental Health, Spirituality and Religion .............................................................. 115  
23. Culture, Spirituality and Management ................................................................ 119  

**Section III: Behavioural Neurosciences**
24. Neuroanatomy and Psychiatry ............................................................................. 125  
25. Psycho-neurochemistry ....................................................................................... 134  
26. Psychoendocrinology ........................................................................................... 142  
27. Psycho-neurological Investigations ....................................................................... 144  
28. Genetics of Mental Disorders ............................................................................. 147
Section IV: Clinical Adult Psychiatry

29. Aetiology in Psychiatry ................................................................. 153
30. Psychopathology ........................................................................ 156
31. Psychiatric Interview, Assessment and Classification .................... 162
32. Somatoform and Dissociative Disorders ........................................ 174
33. Mood Disorders ........................................................................... 190
34. Anxiety and Adjustment Disorders ............................................... 214
35. Alcohol and other Substance Related Disorders ............................ 228
36. Sexual Disorders, Paraphilias and Gender Issues ............................ 254
37. Personality Disorders .................................................................. 277
38. Schizophrenia and other Psychotic Disorders ................................. 287
39. Suicide and Suicidal Behaviour ...................................................... 304
40. Liaison Psychiatry ........................................................................ 311
41. HIV/AIDS and Mental Health ....................................................... 320
42. Organic Psychiatry ....................................................................... 329
43. Epilepsy ....................................................................................... 348
44. Old Age and Mental Health ........................................................... 360
45. Forensic Psychiatry ...................................................................... 367
46. Psychiatric Emergencies ............................................................... 381
47. Sleep Disorders ........................................................................... 389

Section V: Child and Adolescence Psychiatry

48. Child Psychiatry: An Overview .................................................... 404
49. Adolescent Psychiatry: An Overview ............................................ 410
50. Mental Retardation ....................................................................... 413
51. Pervasive Developmental Disorders ............................................. 417
52. Disruptive Behaviour Disorders ................................................... 423
53. Anxiety Disorders of Childhood and Adolescence .......................... 431
54. Mood Disorders in Children and Adolescents ............................... 437
55. Psychotic Disorders in Childhood and Adolescence ....................... 441
56. Tic Disorders ............................................................................... 446
57. Sexual and other Types of Child Abuse ........................................ 450
58. Eating Disorders ........................................................................... 454
59. Other Disorders and Presentations ................................................ 460

Section VI Part A: Pysical Treatments

60. Ethno-Psychopharmacology and its Implications in the African Context 470
61. Psychopharmacotherapy ............................................................... 478
62. Electroconvulsive Therapy (ECT) ................................................. 489

Section VI Part B: Non-Biological Treatments

63. Psychotherapy .............................................................................. 495
64. Cognitive Behaviour Therapy (CBT) ............................................. 504
65. Counselling ............................................................................... 507
66. Group, Marital and Family Therapies ........................................... 510
67. Loss and Bereavement Therapies .................................................................................. 516
68. Occupational Therapy, Rehabilitation, Community Psychiatry and Social Support Networks .................................................................................. 522

Section VI Part C: Emerging Trends
69. Complementary and Alternative Medicine in Psychiatry ........................................... 531
70. Nursing in Mental Health ............................................................................................. 535

Section VII: Research and Ethics
71. Research and Bio Statistics in Mental Health ................................................................ 549
72. Ethics in Psychiatric Research ...................................................................................... 559
73. Ethics in the Practice of Psychiatry and Mental Health ................................................ 567

Section VIII: Postscript
74. The Practice of Psychiatry in Africa - A Personal Experience ........................................ 577

Appendices
Appendix 1: WMA Declaration of Helsinki 2000 ................................................................. 582
Appendix 2: International Ethical Guidelines for Biomedical Research ................................ 586

List of Contributors ........................................................................................................ 591
